Summary

I've got a solid grip on artificial intelligence and machine learning with Python. My main areas of expertise include deep learning, NLP and data science analytics.

Besides that, I have gained hands on experience in full stack and frontend development, app development, as well as database management.

I have a strong knowledge base in data structures and algorithms and I'm able to design, build and launch smart data driven applications confidently.

Education

Dayananda Sagar University, B.Tech in Computer Science Engineering (AI & ML) Sept 2023 – Sept 2027

- GPA: 7.34
- **Coursework:** Artificial Intelligence with Python, Full Stack Development, Front-End Development, Machine Learning, Natural Language Processing, Database Management, Data Science and Analytics, Data Structures and Algorithms, Deep Learning, App Development, Financial Technology, Predictive Analysis.

Experience

Participant – NASA Space Apps Challenge 2025, Local Award Category Winner Oct 2025

- Collaborated with a multidisciplinary team in NASA Space Apps Challenge 2025 to develop an AI-based solution using practical machine learning techniques, earning a Local Award for innovation and implementation.

AI for Sustainable Construction Workshop, Puravankara Limited & Dayananda Sagar University May 2026

- Presented an AI-powered wastewater optimization platform for sustainable construction at the “Lab to Land: AI for Sustainable Construction with Industry Experts” workshop conducted by **Puravankara Limited** and **Dayananda Sagar University**.

Projects

Sharks From Space Challenge Project Completed

- Developed a machine learning pipeline to predict shark locations using environmental factors such as chlorophyll levels, sea surface temperature, and ocean currents, along with visualization maps highlighting high-probability shark presence areas.

RelAI – Natural Disaster Predictor Model

- Developed a Random Forest-based natural disaster prediction system with interactive heatmaps for cyclone, earthquake, and flood risk analysis in India, with the project's conference paper successfully published in **IEEE Xplore**.

AI Chatbot for College Queries

- Developed an NLP-powered multilingual AI chatbot with spelling correction and clarification handling to provide accurate Dayananda Sagar University query support through both web and mobile applications.

AI-Based Sustainable Water Management Platform, Puravankara Limited Jan 2026 – May 2026

- Developed and presented an AI-powered sustainable water management platform with **Puravankara Limited** to optimize treated wastewater utilization for construction and industrial applications across Bengaluru.

RealTwinAI – Portfolio Digital Twin 2026

- Developed **RealTwinAI**, a Digital Twin-based predictive real estate analytics platform for forecasting property trends, rental performance, and investment risks.

Skills

Programming Languages: Python, Java, C, HTML, CSS

Frameworks & Libraries: TensorFlow, PyTorch, Scikit-learn, Pandas, NumPy, Flask, Android Framework

Tools & Databases: Jupyter Notebook, Visual Studio Code, Git, MongoDB, Tableau

Core Competencies: Mobile Application Integration, Machine Learning Integration, Deep Learning, Data Processing and Analysis, Project Development and Deployment, Data Visualization, API Integration and Data Fetching, Frontend and Backend Development, Feature Engineering
